B. Dead Bird-related calls

Refer to the Idaho Department of Fish and Game Regional office in your area (see map - *the Southwest Region in Nampa services the greater Boise area*).

A few quick bird facts:

- Crows, magpies, ravens, jays and raptors are the birds of interest for WNV because they are most susceptible.
- Bird testing is done early in the season to show that the virus is present in a particular area. Fish and Game will STOP testing birds in a community as it becomes clear that the virus is present. There is no need to test every dead bird.
- Discard dead birds in the garbage, wear gloves and wash hands.

C. Horse-related calls

- Refer to your veterinarian if you have questions about your own horse's health.
- If you are interested in learning more about WNV and horses in general, the Idaho State Department of Agriculture has a WNV web site at:
<http://www.idahoag.us/Categories/Animals/animalHealth/healthdisease.php>

D. Pesticide-related calls

Refer to one of the following:

For general questions about pesticide safety and pesticide regulations:

- Call the Idaho State Department of Agriculture Resources Division: 332-8610

If you are interested in doing some research on your own on the web to learn more about pesticides there are several options:

1. Division of Ag Resources Home page:
<http://www.idahoag.us/Categories/Pesticides/indexPesticides.php>
2. IDHW web page: www.westnile.idaho.gov with links to the National Pesticide Information Center.

If you have questions related to actual pesticide exposures?

- call the state toxicologist, Kai Elgethun, at 334-5682

E. Mosquito abatement-related calls

Not all counties have agencies involved in mosquito surveillance or abatement activities. If an abatement entity is not listed below in a particular county, refer to your county commissioners. This list is subject to change.
